The Moving Image as Public Art

Annie Dell'Aria, 2021-05-08 This book maps the presence of moving images within the field of public art through encounters with passersby. It argues that far from mere distraction or spectacle, moving images can produce moments of enchantment that can renew, intensify, or challenge our everyday engagement with public space and each other. These artworks also offer frameworks for understanding how moving images operate in public space—how they move viewers and reconfigure the site of the screen. Each chapter explores a mode of address that examines how artists and curators leverage the moving image's attentional power to engage audiences, create spaces, make place, and

challenge assumptions. This book also examines the difficulties and compromises that arise when using urban screens for public art.

The Five Continents of Theatre
 Eugenio Barba, Nicola Savarese, 2019-02-11
 The Five Continents of Theatre undertakes the exploration of the material culture of the actor, which involves the actors' pragmatic relations and technical functionality, their behaviour, the norms and conventions that interact with those of the audience and the society in which actors and spectators equally take part. The material culture of the actor is organised around body-mind techniques (see *A Dictionary of Theatre Anthropology* by the same authors) and auxiliary techniques whose variety concern: ■ the diverse circumstances that generate theatre performances: festive or civil occasions, celebrations of power, popular feasts such as carnival, calendar recurrences such as New Year, spring and summer festivals; ■ the financial and organisational aspects: costs, contracts, salaries, impresarios, tickets, subscriptions, tours; ■ the information to be provided to the public: announcements, posters, advertising, parades; ■ the spaces for the

performance and those for the spectators: performing spaces in every possible sense of the term; ■ sets, lighting, sound, makeup, costumes, props; ■ the relations established between actor and spectator; ■ the means of transport adopted by actors and even by spectators. Auxiliary techniques repeat themselves not only throughout different historical periods, but also across all theatrical traditions. Interacting dialectically in the stratification of practices, they respond to basic needs that are common to all traditions when a performance has to be created and staged. A comparative overview of auxiliary techniques shows that the material culture of the actor, with its diverse processes, forms and styles, stems from the way in which actors respond to those same practical needs. The authors' research for this aspect of theatre anthropology was based on examination of practices, texts and of 1400 images, chosen as exemplars.

Pantomime Karl

Toepfer, 2019-08-19 This book offers perhaps the most comprehensive history of pantomime ever written. No other book so thoroughly examines the varieties of pantomimic performance from the early Roman Empire, when

the term "pantomime" came into use, until the present. After thoroughly examining the complexities and startlingly imaginative performance strategies of Roman pantomime, the author identifies the peculiar political circumstances that revived and shaped pantomime in France and Austria in the eighteenth century, leading to the Pierrot obsession in the nineteenth century. Modernist aesthetics awakened a huge, highly diverse fascination with pantomime. The book explores an extraordinary variety of modernist and postmodern approaches to pantomime in Germany, Austria, France, numerous countries of Eastern Europe, Russia, Scandinavia, Spain, Belgium, The Netherlands, Chile, England, and The United States. Making use of many performance and historical documents never before included in pantomime histories, the book also discusses pantomime's messy relation to dance, its peculiar uses of music, its "modernization" through silent film aesthetics, and the extent to which writers, performers, or directors are "authors" of pantomimes. Just as importantly, the book explains why,

more than any other performance medium, pantomime allows the spectator to see the body as the agent of narrative action.

Talking Pictures Ann

Hornaday,2017-06-13 A veteran film critic offers a lively, opinionated guide to thinking and talking about movies -- from Casablanca to Clueless Whether we are trying to impress a date after an art house film screening or discussing Oscar nominations among friends, we all need ways to look at and talk about movies. But with so much variety between an Alfred Hitchcock thriller and a Nora Ephron romantic comedy, how can everyday viewers determine what makes a good movie? In Talking Pictures, veteran film critic Ann Hornaday walks us through the production of a typical movie -- from script and casting to final sound edit -- and explains how to evaluate each piece of the process. How do we know if a film has been well-written, above

and beyond snappy dialogue? What constitutes a great screen performance? What goes into praiseworthy cinematography, editing, and sound design? And what does a director really do? In a new epilogue, Hornaday addresses important questions of representation in film and the industry and how this can, and should, effect a movie-watching experience. Full of engaging anecdotes and interviews with actors and filmmakers, Talking Pictures will help us see movies in a whole new light-not just as fans, but as film critics in our own right.

Murder, Inc. James H.

Johnston,2022-03 A chronological narrative of the CIA's assassination operations during the Kennedy administration.

A History of Experimental Film and Video A.L. Rees,2019-07-25 Avant-garde film is almost indefinable. It is in a constant state of change and redefinition. In his highly-acclaimed history of experimental film, A.L. Rees tracks the movement of the film avant-garde between the cinema and modern art (with its postmodern coda). But he

also reconstitutes the film avant-garde as an independent form of art practice with its own internal logic and aesthetic discourse. In this revised and updated edition, Rees introduces experimental film and video to new readers interested in the wider cinema, as well as offering a guide to enthusiasts of avant-garde film and new media arts. Ranging from Cézanne and Dada, via Cocteau, Brakhage and Le Grice, to the new wave of British film and video artists from the 1990s to the present day, this expansive study situates avant-garde film between the cinema and the gallery, with many links to sonic as well as visual arts. The new edition includes a review of current scholarship in avant-garde film history and includes updated reading and viewing lists. It also features a new introduction and concluding chapter, which assess the rise of video projection in the gallery since the millennium, and describe new work by the latest generation of experimental film-makers. The new edition is richly illustrated with images of the art works discussed.

Biogas from Waste and Renewable Resources Dieter Deublein,Angelika Steinhauser,2008-04-18 Written as a practical introduction to biogas plant design and operation, this book fills a huge gap by presenting a systematic guide to this emerging technology -- information otherwise only available in poorly intelligible reports by US

governmental and other official agencies. The author draws on teaching material from a university course as well as a wide variety of industrial biogas projects he has been involved with, thus combining didactical skill with real-life examples. Alongside biological and technical aspects of biogas generation, this timely work also looks at safety and legal aspects as well as environmental considerations.

Between Stillness and Motion

Eivind Røssaak, 2011 Since the development of film as an artistic medium in the 1890s, there has been an inherent tension between still photographic images and moving cinematic images, from their form and function to the messages they convey and their impact on the beholder and on culture at large. This volume, one of the first book-length works to analyze, critique, and further the international debate about the meaning and use of motion and stillness in film and photography, takes these concepts out of the theoretical arena of cinematic studies and applies them to the wider and ever-changing landscape of images and media. With contributions from

such acclaimed international scholars as Tom Gunning, Thomas Elsaesser, Mark B. N. Hansen, George Baker, Ina Blom, and Christa Blümlinger, these collected essays examine the strategic uses of stillness and motion in art from the mid-nineteenth century to the technologically driven present.
