**Ingmar Bergman's Persona** Lloyd Michaels,2000 Long held to be among the world's greatest filmmakers, Ingmar Bergman shaped international art cinema from the 1950s to the 1980s. Among his many works, Persona is often considered to be his masterpiece and is often described as one of the central works of Modernism. Bergman himself claimed that this film 'touched wordless secrets only the cinema can discover'. The essays collected in this volume, and published for the first time, use a variety of methodologies to explore topics such as acting technique, genre, and dramaturgy. It also includes translations of Bergman's early writings that have never before been available in English, as well as an updated filmography and bibliography that cover the filmmaker's most recent work.

*San Antonio* Paris Permenter, John Bigley,2002-05 An illustrated guide to San Antonio, Texas, including accommodations, attractions, history, and shopping.

**Widescreen Cinema** John Belton,1992 Ladies and gentlemen: THIS IS CINERAMA. With these words, on September 30, 1952, the heavy red curtains in New York's Broadway Theatre opened on a panoramic Technicolor image

of the Rockaways Playland Atom-Smasher Roller Coaster--and moviegoers were abruptly plunged into a new and revolutionary experience. The cinematic transformation heralded by this giddy ride was, however, neither as sudden nor as straightforward as it seemed. Widescreen Cinema leads us through the twists and turns and decades it took for film to change its shape and, along the way, shows how this fitful process reflects the vagaries of cultural history. Widescreen and wide-film processes had existed since the 1890s. Why, then, John Belton asks, did 35mm film become a standard? Why did a widescreen revolution fail in the 1920s but succeed in the 1950s? And why did movies shrink again in the 1960s, leaving us with the small screen multiplexes and mall cinemas that we know today? The answers, he discovers, have as much to do with popular notions of leisure time and entertainment as with technology. Beginning with film's progress from peepshow to projection in 1896 and focusing on crucial stages in film history, such as the advent of sound, Belton puts widescreen cinema into its proper cultural context. He shows how Cinerama, CinemaScope, Vista Vision, Todd-AO, and other widescreen processes marked significant changes in the conditions of spectatorship after World War 11 -and how the film industry itself sought to redefine those conditions. The technical, the economic, the social, the aesthetic -every aspect of the changes shaping and reshaping film comes under Belton's scrutiny as he reconstructs the complex history of widescreen cinema and relates this history to developments in mass-produced leisure-time entertainment in the twentieth century. Highly readable even at its most technical, this book illuminates a

central episode in the evolution of cinema and, in doing so, reveals a great deal about the shifting fit between film and society.

**Rendezvous with Rama** Arthur C. Clarke, 2012-11-30 Astronauts explore an alien spacecraft hurtling toward the sun in this Hugo and Nebula Award-winning novel—"a stone-cold classic" of hard sci-fi (The Guardian). An enormous cylindrical object has entered Earth's solar system on a collision course with the sun. A team of astronauts are sent to explore the mysterious craft, which the denizens of the solar system name Rama. What they find is astonishing evidence of a civilization far more advanced than ours. They find an interior stretching over fifty kilometers; a forbidding cylindrical sea; mysterious and inaccessible buildings; and strange machine-animal hybrids, or "biots," that inhabit the ship. But what they don't find is an alien presence. So who—and where—are the Ramans? Often listed as one of Clarke's finest novels, *Rendezvous with Rama* won numerous awards, including the Hugo, the Nebula, the Jupiter, and the British Science Fiction Awards. A fast-paced and compelling story of an enigmatic encounter with alien technology, *Rendezvous with Rama* offers both answers and unsolved mysteries that will continue to fascinate readers for generations. "Mr. Clarke is splendid . . . We experience that chilling touch of the alien, the not-quite-knowable, that distinguishes SF at its most technically imaginative." —The New York Times

*Iron Man: The Gauntlet* Eoin Colfer, 2016-10-25 Tony Stark is known throughout the world as many things: billionaire, inventor, Avenger. But mainly for being

**3-D Revolution** Ray Zone, 2012-05-01 In 2009, *Avatar*, a 3-D movie directed by James Cameron, became the most successful motion picture of all time, a technological breakthrough that has grossed more than \$2.5 billion worldwide. Its seamless computer-generated imagery and live action stereo photography effectively defined the importance of 3-D to the future of cinema, as well as all other

currently evolving digital displays. Though stereoscopic cinema began in the early nineteenth century and exploded in the 1950s in Hollywood, its present status as an enduring genre was confirmed by *Avatar*'s success. *3-D Revolution: The History of Modern Stereoscopic Cinema* traces the rise of modern 3-D technology from Arch Oboler's *Bwana Devil* (1952), which launched the 50s 3-D boom in Hollywood, to the rapidly-modernizing 3-D industry today. *Ray Zone* takes a comprehensive approach that not only examines the technology of the films, but also investigates the business, culture, and art of their production. Influencing new generations of filmmakers for decades, the evolution of 3-D cinema technology continues to fill our theaters with summer blockbusters and holiday megahits.

*Theatres of Portland* Gary Lacher, Steve Stone,2009

Portland's theatre history is marked by early enthusiasm and exceptionally vigorous growth. With the Pacific Northwest's often rainy weather, people sought refuge in movie entertainment, and the city eventually grew to have more theatre seats per capita than similar-sized cities in the United States. Beginning with short cinema segments at vaudeville houses downtown, Portland movie theatres came into their own swiftly and ambitiously. By 1915, there were over 70 individual theatres showing films both downtown and in neighborhoods throughout the city. By the 1920s, larger theatres were being built, including substantial neighborhood palaces such as the Bagdad, Hollywood, and Oriental. Meanwhile, downtown provided the Broadway, Portland, and Orpheum, to name a few. This volume contains an overview of Portland's theatre history through rare and newly discovered historical photographs of those memorable places of entertainment.
