The Sex-Starved Marriage Michele Weiner-Davis, 2004 'Not tonight, darling, I've got a headache...' An estimated one in three couples suffer from problems associated with one partner having a higher libido than the other. Marriage therapist Michele Weiner Davis has written THE SEX-STARVED MARRIAGE to help couples come to terms with this problem. Weiner Davis shows you how to address psychological factors like depression, poor body image and communication

problems that affect sexual desire. With separate chapters for the spouse that's ready for action and the spouse that's ready for sleep, THE SEX-STARVED MARRIAGE will help you re-spark your passion and stop you fighting about sex. Weiner Davis is renowned for her straight-talking style and here she puts it to great use to let you know you're not alone in having marital sex problems. Bitterness or complacency about ho-hum sex can ruin a marriage, breaking the emotional tie of good sex.

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their

courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will

always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Truth Is a Woman Loren

Jakobov,2017-09-12 Truth Is A Woman is a poetry collection by Loren Jakobov written in response to her friends tragic death in 2015 as a victim of rape and murder. The poems discuss the World from the eyes of a woman, the pain and the beauty that lies therein.

Wild Oats Lloyd Shesky,Bob

Barnett,Scott T. Whitaker,2017 The case highlights Mike Gilliland, who built a single organic foods store in 1987 in Boulder, Colorado, into Wild Oats Markets, a chain of natural foods stores that by 2001 had annual sales of \$1 billion and stores in 38 states. The case includes a history of the natural foods business and explores why Gilliland's timing was so favorable. By the 1980s, when Gilliland got started, the natural foods business had grown and matured, consisting mostly of small specialty stores selling locally grown

natural foods. Although the industry was created by the California counter-culturists, it was built into a national phenomenon by the second generation of leaders, including Gilliland and Whole Foods founder John Mackey. The natural foods industry was clubby and congenial until Gilliland sought to grow his business beyond Boulder, Colorado, expanding into four states, including California. Mackey responded by moving into Boulder. Whole Foods became the nation's number one natural foods seller by the early 1990s. Whole Foods went public in 1992, and Wild Oats, in 1996. Whole Foods's success had begun to erode Wild Oats's market share, hurt sales growth, and depress the stock price. Gilliland favored taking Wild Oats in a new direction, modeled after Henry's Marketplace, a San Diego chain that Wild Oats had purchased in 2000. Henry's approach was to offer a product mix that appealed to a broader range of people than did the natural foods stores. Henry's competed effectively with Whole Foods because it had a different customer base; the stores were cheap to build if the

company wanted to expand; and the company had showed sustained growth since its founding in 1943. But the Wild Oats board of directors disagreed, opting instead for continuing on the same path. The board also expressed an interest in replacing Gilliland. He now had to weigh his options and contemplate leaving the company he had nurtured for the past twenty (years). This case can be used to examine the importance of long-range planning. Entrepreneurs tend to be reactive; they often succeed because they seize opportunities when they become available. The ability to recognize an opportunity and to seize it is an important entrepreneurial strength, but it can prove fatal if not balanced with proactive strategic planning.

AMG, Inc. & Forsythe Solutions
Mark Jeffery, 2017 Examines the lease vs. buy decision for investments in technology. Addresses pivotal investment decision issues such as varying the length of the lease, the useful life of the equipment, and alignment with the company's overall financial strategy. The scenario is for a

real financial services firm that has been disguised for confidentiality reasons. Presents an investment decision: should a company buy or lease technology with a relatively short useful life? The new controller at AMG, a Fortune 500 financial services firm, has been tasked with determining how to finance the acquisition of 7,542 new PCs to be rolled out over the next 12 months. This is a \$6.7 million investment decision and the rollout schedule adds significant complexity to the solution. The controller must choose between buying or leasing the computers over 24- or 36-month time frames. Provides a framework for analyzing similar investment decisions. The key learning point is that leasing information technology can be cheaper than buying. This is contradictory to a car lease, which may be familiar from everyday experience. A new car has a potentially long useful life and can retain significant value after several years, hence, intuition is that buying should always be cheaper than leasing. Shows that this is not the case for information technology. Teaches the correct application of the mid-quarter

convention within MACRS depreciation for technology, and the implications of operating vs. capital leases and off-balance-sheet financing. In the process, introduces the four tests for a capital lease. Finally, shows how creative analysis techniques can be used to simplify complex decisions. These techniques aid in arriving at a conclusion faster and with less effort. To illustrate the fundamentals of lease vs. buy decisions in technology and how they differ from the typical capital equipment lease vs. buy decision. Topics covered include MACRS depreciation and off-balance-sheet financing for a complex leasing scenario staggered in time across multiple business units.

YouTube, Google, and the Rise of Internet Video Karel O. Cool, Matt Seitz, Jason Mestrits, Sona Bajaria, Uday Yadati, 2009 Although Google had a stellar performance in Web search, many of its other services, such as Google Video, were less successful. This case describes how YouTube came to dominate the video market for user-generated content (UGC), while Google Video tried various entry strategies and

ultimately failed, ending with the acquisition of YouTube. It also reviews the various competitors in the UGC market, chronicles the entry of established and new players in the area of professionally generated content (PGC), and outlines the key challenges related to monetizing the acquisition of YouTube for Google.
